Violet (Ziwei) Wang

Waterloo, ON • (226) 600-8699 • ziv.wang02@gmail.com • linkedin.com/in/violet-ziwei-wang • github.com/ziv-vw

SUMMARY

Computer Science and Business Administration graduate from the University of Waterloo and Wilfrid Laurier University, with experience developing internal automation tools and building software projects in C++ and C. Strong foundation in object-oriented programming, data structures, algorithms, databases, and systems concepts, complemented by practical experience translating business requirements into technical solutions.

TECHNICAL SKILLS

Languages	C++, C, Python, Java, SQL, MIPS Assembly, VBA
Computer Science	Object-Oriented Programming, Data Structures, Algorithms, Memory Management, Operating Systems, Database Systems, Computer Networks
Tools	Git, GitHub, Visual Studio, Microsoft Excel, Power Automate, SharePoint

EDUCATION

University of Waterloo & Wilfrid Laurier University Aug 2026

Honours Bachelor of Computer Science & Honours Bachelor of Business Administration, Double Degree (Co-op)

- Cumulative average: 85.38/100 · Excellent Standing and Term Distinction — all 10 terms
- Relevant coursework: Foundations of Sequential Programs (CS 241, 94%), Computer Organization & Design (CS 251, 94%), Database Management (CS 348, 90%), Object-Oriented Software Development (CS 246), Data Structures & Data Management (CS 240), Algorithms (CS 341), Operating Systems (CS 350), Machine Learning (CS 480)

TECHNICAL PROJECTS

C++ Chess Game | *Object-Oriented Software Development (CS 246)* *C++*

- Developed a modular chess game in C++, applying object-oriented design, design patterns, and polymorphism to separate game logic, board state, and user interaction
- Implemented piece movement and validation logic, including legal-move checks and check/checkmate detection

24 Points Solver *C*

- Wrote a solver in C that searches every ordering of four cards and the four arithmetic operators to determine whether a hand can reach 24, with an interactive terminal version

Compiler and Assembler | *Foundations of Sequential Programs (CS 241)* *C++*

- Built a compiler and assembler pipeline that translates a high-level language subset into MIPS assembly, covering tokenization, parsing, abstract syntax tree construction, symbol tables, stack layout, and code generation

PROFESSIONAL EXPERIENCE

Financial Analyst Intern — Whirlpool Canada Sep 2025 – Dec 2025

Mississauga, ON

- Automated month-end accrual calculations with a formula-driven Google Sheets solution, reducing manual effort by approximately 70% while improving accuracy
- Tested compatibility during the migration from SAP BEx Analyzer to SAP Analysis for Office, rebuilt and validated reports, and prepared user guides and training materials

Business Systems Analyst Intern — CIBC Sep 2024 – Dec 2024

Toronto, ON

- Developed a VBA solution to filter and archive system-generated emails when Power Automate was unavailable due to licensing constraints, reducing manual handling for daily team operations
- Streamlined business-case workflows using Power Automate and SharePoint, improving process organization and documentation accessibility

Finance Intern — GE Grid Solutions Feb 2024 – May 2024

Markham, ON

- Converted a P&L reporting template from Essbase to Oracle Hyperion Financial Management, validating outputs for consistency between the old and new systems
- Built travel & living spend dashboards and authored onboarding SOPs with automated Excel templates for future interns

Assurance Intern — Grant Thornton LLP Canada Jan 2023 – Apr 2023

Waterloo, ON

- Prepared corporate year-end files and a high volume of personal tax returns using Sage and QuickBooks, iterating on reviewer feedback to improve accuracy and throughput
