Analytics: Data analysis, variance analysis, root-cause investigation, KPI reporting, forecasting, financial modeling, statistical analysis, machine learning fundamentals

Tools & Automation: Advanced Excel, VBA, Google Sheets, Power Automate, SAP Analysis for Office, Oracle HFM, SharePoint

EXPERIENCE

Financial Analyst Intern Mississauga, ON

Whirlpool Canada *Sep 2025 – Dec 2025*

- Led the 2026 New Business Development profit plan and supported the Major Appliances plan, building a standardized planning template to consolidate business inputs and support financial analysis and leadership reviews.
- Developed a post-promotion analysis framework using pricing-waterfall data to evaluate promotional ROI and break-even performance, supporting discussions with Finance and Sales.
- Automated month-end accrual calculations using Google Sheets formulas, reducing manual effort by approximately 70% while improving process consistency.
- Tested report compatibility during the migration from SAP BEx Analyzer to SAP Analysis for Office, rebuilding and validating reports and preparing user guides.

Business Systems Analyst Intern Toronto, ON

CIBC *Sep 2024 – Dec 2024*

- Analyzed project time-log data to identify actual-versus-estimated person-day variances, investigated root causes with project managers, and supported improvements to future resource estimates.
- Developed a VBA script to classify and archive system-generated emails when the required Power Automate capabilities were unavailable, streamlining recurring mailbox management.
- Improved business-case workflows using Power Automate and reorganized SharePoint documentation; created video walkthroughs to standardize the team's Definition-of-Ready process.

Finance Intern Markham, ON

GE Grid Solutions *Feb 2024 – May 2024*

- Built a travel and living expense dashboard to break down spending by function and expense owner, improving visibility into departmental spending.
- Supported the conversion of a P&L reporting template from Essbase to Oracle HFM, validating reporting outputs and performing recurring reconciliations and financial controls.
- Performed billing and order-margin reconciliations, foreign-exchange clearing, and revenue-deferral checks to support financial reporting accuracy.
- Created onboarding documentation and Excel templates to standardize recurring finance tasks.

Assurance Intern Waterloo, ON

Grant Thornton LLP Canada *Jan 2023 – Apr 2023*

- Prepared corporate year-end working papers, bookkeeping records, and financial statements using Sage and QuickBooks, and prepared personal tax returns while addressing reviewer feedback to improve file quality and efficiency.

PROJECTS

Encrypted Web Traffic Analysis *| CS459: Computer Security and Privacy*

- Analyzed packet timing, direction, and size features in encrypted web traffic to investigate website fingerprinting and machine-learning-based classification.
- Examined how traffic-defense mechanisms affect classification performance, privacy protection, and overhead, evaluating trade-offs between security and system efficiency.

Financial Modeling & Valuation *| MyStoria SaaS, BU403 Entrepreneurial Finance*

- Built an Excel-based, multi-period revenue forecast by translating market-sizing assumptions and projected growth into financial estimates.
- Applied discounted cash flow and comparable-company valuation methods, incorporating WACC, terminal value, and peer multiples to estimate a valuation range.
